

MAINTENANCE GUIDE

FOR **LINDDNA** GLASS MATS / TABLE MATS

LIND DNA mats are easily cleaned with a wet cloth and window spray.

Certain foods and liquids may result in permanent stains if they are not cleaned right away. Tannins, and substances like curry, saffron, paprika or chili may be problematic especially on lighter colour mats. Wash immediately to avoid permanent damage.

Do not place hot items such as pots and frying pans on the mats.

Do not fold the mats or allow them to crease.

Avoid direct sunlight exposure for longer periods of time as this may affect the structure of the leather.

Make sure to place the mats on a dry surface.

Do not run the mats through a dishwasher.
